Adapty AB

IT Support

May 2021 – Ongoing

Gothenburg

- Part-time technical support, worked with Google Workspace Administration using command line tools such as **GAM**.

Projects

Clean Architecture Enterprise Boiler Plate | [Source Code](#)

C# | Swagger | CQRS

- Developed an **enterprise boilerplate** API with **Clean Architecture** in **C#** and **.NET** to ensure a scalable and maintainable code structure for enterprise applications.
- Implemented **dependency injection** and **unit tests** to improve modularity and code quality, making the development and maintenance processes smoother.
- Created solutions for **error handling** and **logging** to provide reliable insights into the application's performance and issues.
- Configured and managed **application settings** using **environment variables** and configuration files to promote flexible and secure application deployment.

Next.JS Portfolio Website | [Source Code](#) | [Preview](#)

Next.JS | React | JavaScript | Tailwind CSS

- Developed a **Next.JS website** using React, JavaScript and Tailwind.
- The purpose of the website was most of all to practice my frontend skills, but it is also a good way to display things such as my skills, experience and education.
